Task 4 – Report Write-up

NAME: BHUMIKA SHARMA

REGISTRATION NUMBER: 25BOE10070

BRANCH: B.Tech Bioengineering

In this task, I learned the importance of maintaining professionalism while communicating in the digital world. I drafted two formal emails—one requesting an extension for an assignment and another expressing interest in a summer internship. While writing these emails, I focused on including clear subject lines, proper greetings, well-structured content, and polite sign-offs, which are essential elements of effective communication.

Additionally, I created a checklist of do’s and don’ts for responsible social media usage. This helped me understand how online behavior can impact a person’s image and reputation. Poor digital communication, such as using informal language or unclear messages, can create misunderstandings and leave a negative impression. For instance, sending an email without a proper subject line or greeting may appear unprofessional. Such situations can be avoided by following basic etiquette rules. Overall, this task improved my awareness of professional communication and its importance in academic and professional life.
