Task 2 – Report Write-up

NAME: BHUMIKA SHARMA

REGISTRATION NUMBER: 25BOE10070

BRANCH: B.Tech Bioengineering

In this task, I created my digital portfolio by setting up profiles on GitHub, LinkedIn, and Kaggle. GitHub helped me learn how to manage and upload my projects in an organized way, making it easier to showcase my work. LinkedIn allowed me to build a professional online presence, where I added my academic details, skills, and connected with others.

Additionally, I explored Kaggle, which introduced me to a platform focused on data science and problem-solving. I learned how beginners can participate in challenges, explore datasets, and improve their analytical skills. Creating profiles on these platforms helped me understand how different tools are used for different purposes in the professional world.

This task made me realize the importance of having a strong digital identity. These platforms can help in gaining knowledge, improving skills, and finding future opportunities like internships and collaborations. Overall, this task enhanced my awareness of using online platforms for academic and career growth.
